Election/Restriction

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-7, drawn to methods for inhibiting 5-lipoxygenase and methods of treating a leukotriene-related disease, classified in various subclasses of class 514, depending on the compound of instant formula I contemplated.
- II. Claims 8 and 9, drawn to methods for preparing a compound of formula I, classified in various subclasses of classes 546 and 548, depending on the compound of instant formula I contemplated.

The inventions are distinct, each from the other, for the following reasons:

Inventions II and I are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In the instant case 5-lipoxygenase may be inhibited by non-benzoxazole derivatives. Alternatively, the compounds that are prepared by the methods disclosed in instant claims 8 and 9 have uses unrelated to 5-lipoxygenase inhibition.

The Groups have acquired a separate status in the art by their recognized, divergent subject matter. The searches required for each Group are not co-extensive resulting in an undue burden to the Examiner. Each Group is capable of supporting a separate patent.

Restriction for examination purposes as indicated is proper.

Further, claims 1-7 are generic to a plurality of disclosed patentably distinct species comprising a compound of instant formula I, as disclosed in the present specification. Applicants are required under 35 U.S.C. 121 to elect a single disclosed species if Group I is elected, even though this requirement is traversed.

Should Applicants traverse on the ground that the species are not patentably distinct, Applicants should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the Examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

Applicants are advised that to be complete, the reply to this requirement must include an election of the invention to be examined even though the requirement is traversed (37 CFR 1.143).

A telephone call to the attorney is not required where: 1) the restriction requirement is complex; 2) the application is being prosecuted *pro se*; or, 3) the Examiner knows from past experience that a telephone election will not be made. See MPEP 812.01.

Any inquiry concerning this communication or earlier communications from the Examiner should be directed to Phyllis G. Spivack whose telephone number is 571-272-0585. The Examiner can normally be reached on 10:30 AM-7 PM.
